DIARY NOTES

DD/S

3 December 1965

1. At the Executive Committee Meeting today:

a. The DCI paid a high compliment to the Medical Staff after hearing that their blood testing and audio testing techniques were being circulated by the White House to other Government agencies as a cost-savings example. I passed these compliments on to [REDACTED] for the benefit of his office. 25X1A

c. We discussed the policy of Christmas parties and agreed that it would be the same as before and played in a low key. (I will discuss this with Colonel White and mention it at the DD/S Staff Meeting without having a formal notice issued.)

2. The DDCI called a meeting concerning the correlation of the Agency R&D program which will amount to a request of [REDACTED] for FY 67. He advised that we must have an integrated program that we can defend before the Bureau of the Budget. He advised that a DD/S&T representative would be appointed as a single coordinator of all Agency R&D activities to ensure program activities, avoiding duplication, and reallocation where advisable in Agency interests. All Directorates were in full agreement with the principal exception of NPIC (Art Lundahl) who cited NPIC's privilege of being independent from the Agency in its research activities). Art's position was not accepted and he was reminded that he gets his money from the Agency. Mr. Helms and Colonel White will issue a directive on this subject. 25X1A

3. I agreed with Jack Earman and Security that [REDACTED] and his group should be polygraphed for their work on the procurement survey. Mr. Earman will go to [REDACTED] and discuss this action with [REDACTED]. We do not anticipate any problem. 25X1A
